# HyStore SERIES

LASER CUTTING SYSTEM AND INTELLIGENT STORGE SYSTEM

■ Customer benefits

- Songu laser cutting machine is equipped with Hystore series automatic loading and unloading and storage systems which are controlled through the software to realize an unattended automated intelligent laser cutting production;

- With independent research and development integrated flexible production system, it can meet the management needs of modern manufacturing enterprises for processing automation, production flexibility n and manufacturing intelligence;

- Multi-level storage unit, the number of storage floors can be customized according to user needs, greatly increasing the utilization rate of the site;

- Adopting modular design, fit can realize the linkage loading and unloading of single machine and multiple machines;

- EtherCAT bus communication, seamlessly docking with the intelligent factory MES system, to create a digital intelligence production workshop.

■ Characteristics

Laser cutting with intelligent
load, upload and storage system

Customizable
multi-layer storage

BECKHOFF
Motion control systems

No manual lifting
and guarding required
