

PCF 0606-L-A

LINEAR MOTOR FIBER LASER CUTTING MACHINE

■ Customer benefits

- Equips with linear motor to achieve maximum 1.5G acceleration, high efficiency;
- Adopts marble platform and steel welded body design to guarantee the machine accuracy and stability;
- Professional laser cutting software, easy for coil sheet cutting form roll to roll;
- CCD version system optional.

■ Characteristics

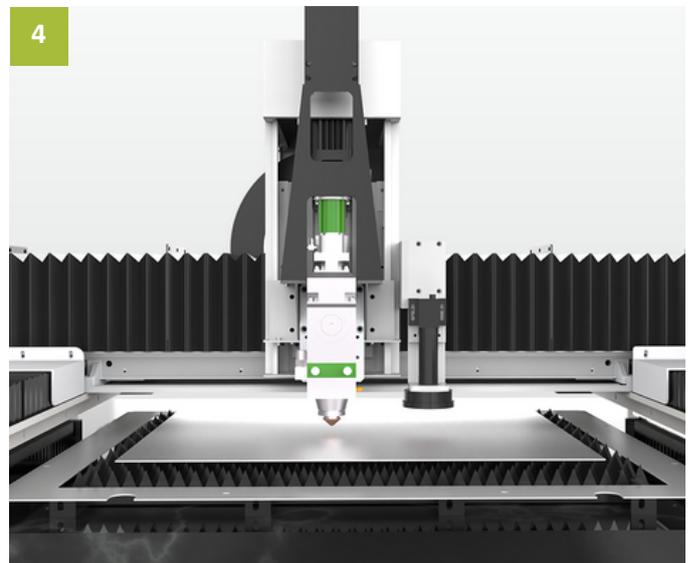

Linear motor gantry
dual drive structure

Easy for automatic
loading roll to roll cutting

Marble platform with
steel welded body design

Professional laser
cutting software

■ Specification

| Model | PCF0606-L-A |
|-------------------------------|------------------|
| Working area | 600 × 600mm |
| Laser power | 500~1500W |
| Laser wavelength | 1064nm |
| Cutting thickness | ≤2mm |
| Repeated positioning accuracy | ±0.003mm/m |
| Weight | 1800kg |
| Overall dimension | 1800×1470×1900mm |
